Subject: Justice Obie's invention

To Whom it May Concern,

My name is Cynthia Lloyd. I am 49 year old female radiologist in California, USA. I reached out to Mr. Obie a year ago out of desperation for recurrent laryngeal papillomatosis that had become carcinoma in situ on my vocal cord. My vocal cords have been red and inflamed since age 32. I am unsure the etiology of the irritation, other than HPV virus was obviously present, given that a papilloma has been removed about every 2-3 years since then. There may have been some moderating factors with gastroesophageal reflux.

To make a long story short, I used his product with a snoot nasal and sinus cleaner (snootspray.com) and inhaled the substance gently to my vocal cords twice a day for several weeks. I am now 15 months out and my ENT is impressed that my vocal cords look normal for the first time in 18 years. They are no longer red, edematous and irritated. Other habits such as daily soda and occasional alcohol has not changed. Upon Mr. Obie's advice, I also take a glutathione supplement once daily. The ENT does not want to form opinions about the offlabel use of drug but stated, "Whatever you're doing, keep doing it." He is a vocal cord specialist and sees a lot of laryngeal papillomatosis, at University California Irvine. Sunil Verma, MD (714)456-7017.

I had a chest xray prior to inhaling the medicine and it was very normal. I noticed an occasional cough over that last year, that occurred after inhaling the product. I have not repeated the xray to see if there is any lung scarring. I did try to not get large amounts in my lungs. Although I wondered if HPV is linked to lung cancer as well, but I have heard some contrary evidence of that since then.

I also had a history of perineal warts and cervical dysplasia at age 19 with laser surgery 3 times. I tested positive for HPV 16/18 at that time. However by age 20, it seemed to resolve on its own and pap smears have been normal since then. For good measure, I also administered Dr. Obie's medicine vaginally for several weeks and spread it around the anal opening and on the perineal skin. Upon visit to the gynecologist 3 months later, I tested negative for HPV. My gynecologist felt that it could still be present, even if testing negative for it.

I had a flat wart on the dorsum of my foot. I put the medicine on the foot under a bandage for several weeks and it ate away at the skin but did not kill that particular wart.

Sincerely,
Cynthia Lloyd, MD

Very pleased. Just have to be careful how its applied. I believe this stuff could cure throat and other cancers. It is amazing how it works. It like it rearranged the scion cells and then they grew back normal.

Subject: Patient of Dr Obi

Hello Don,

I was a patient of Dr Justice Obi. I had been to a gynecologist for my first papsmear. They diagnosed me with HPV.

I then realized we have no cure for this. That cancers of all sorts can appear having hpv.

I was very nervous and emotionally drained from the thought of having something they can't cure!!!!

So I researched online and came across Dr.Obi's cure potion.

I emailed Him, and he was very responsive and helpful. I explained my story. Dr. Obi sent me his potion for a series of 7 days. I followed his instructions to a science.

I kept in touch with him every day. The kind of HPV I had wasn't herpes, but the strains that can cause cancer of throat, anus, cervical, and others.

So after trying the potions as instructed I did also quit smoking. I was feeling better and kicked the habit after 16 years!!!! I believe this also helped me quit smoking!!!

So after I completed the process of treatment/CURE. I had a re test done for any HPV, and results were completely negative!!!

I went for my annual pap-smear test and ovarian, and uterine testing and everything was clear! No HPV at all!!!!

I believe in Dr Obis solution and Cure. He seems to truly care for his patients and was there for me when I needed to vent or chat!

Sincerely Shalisa Nei

Subject: Dr Obi, and HPV cure

TESTIMONY

Good Morning Dr. Don,

I am writing you on behalf of Dr. Obi and his cure for the HPV virus. I am a 34 year old woman from the Chicagoland area in Illinois (Unites States). I would like to share with you my experience with Dr. Obi. A few years ago I had gone to the doctor because of some bumps, and discovered that I had genital warts. I did an HPV test to find out which types of the virus I had and discovered I also had a type that was high risk for cervical cancer. I talked with my doctor, who explained to me that we could treat the warts (by using an acid to kill them, and they would fall off) but that there was nothing that could be done about the high risk strain of the virus. All we could do was monitor with pap smears to see if I was going to get cervical cancer. After weeks and months of treatment for the warts, they were still there. The treatments did nothing but cause pain. Also, I had never been so scared in my entire life that I might get cervical cancer. Every article I read online made me even more scared. I literally could not sleep at night because of my worry. I knew there had to be something I could do. So I searched the internet for anyone I could find who was researching a cure to HPV. From this, I came across Dr. Obi. He explained how he had found a cure that had already worked on many people, men and women. He sent it to me and explained how it works. I used the gel on the warts, and the douche for one week for the high risk strain. The warts were a little stubborn, but they finally disappeared. I took another HPV test after Dr Obi's treatment, and no longer showed any sign of the virus. The test came up negative. It was gone!! And Dr Obi was so great the whole time. He was always available to talk or reassure me if I had any questions or doubts. It has now been a few years since I used his treatment, and I have never had any reoccurrence of the warts. And every test I take shows negative for HPV. I've never had an abnormal pap tests either.

This cure really needs to be on the market for all people. I hope no one ever feels as scared as I was, and think there is nothing you can do but wait.

Please, feel free to reach out to me if you have any questions or if I can help in any other way. Also, I would like to keep my infor nation confidential. But please contact me if you need me to do otherwise.
